DETAILED ACTION

Allowable Subject Matter

1. Claims 1-42 are allowed over the prior art of record.
2. The following is an examiner's statement of reasons for allowance:

The prior art fails to teach a method for detecting printed products, from a gripper conveyor to a stacker infeed, among other features, comprising the steps of: determining if a printed product is deposited from a gripper to the conveyor; accumulating a count for each product; and tracking the travel of the product along the conveyor or detecting folded edges of products at a given location and providing a position for each product.

The prior art also fails to teach a gripper conveyor for conveying printed products, among other features, comprising: a product sensor for detecting a presence of a product; a generator for generating pluses representing movement of a lay-down conveyor; and an accumulator for accumulating pulses.

The prior art made of record and not relied upon is considered pertinent to applicant's disclosure.

I) Sjogren et al. (US 6,876,716) disclose a newspaper counting method and apparatus an image sensing device creates an image of a given region which includes the leading edge of the newspaper creating a shadow. The image is compared with stored criteria to determine the count.

Any comments considered necessary by applicant must be submitted no later than the payment of the issue fee and, to avoid processing delays, should preferably accompany the issue

fee. Such submissions should be clearly labeled "Comments on Statement of Reasons for Allowance."
